

Developing Oil and Gas Reserves Estimation Practices

CESO partnered with the Mineral Resources and Petroleum Authority of Mongolia (MRPAM) to develop a national petroleum reserves classification system.

CESO VAs worked in collaboration with Sproule, an Alberta-based international petroleum consulting firm, to provide training on international best practices and Petroleum Resources Management Systems (PRMS) to key professionals in the sector in order to better manage the challenges in regulating reserves estimation policy and setting up responsible implementation processes in the country.
